DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The only disclosure relating to associating a connection in a plug with an electrode is detailed at page 11, lines 10-32 of the specification. At page 11, line 13-16, the specification states that "known techniques would involve ... removal of the insulation followed by identification of the appropriate conducting wire at the proximal connector 79." There is no disclosure of applying, detecting, and identifying as set forth in claim 2. Further, the remainder of the paragraph on page 11 describes methodology for determining where an electrode may be created and the subsequent creation of the electrode. The steps of applying, detecting, and identifying as set forth in claim 1 are not disclosed. Since this application is a division of 08/387,832, the methods set forth in the claims fail to be supported by the original disclosure.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 3739

regards as the invention. Claim 1 – “the distal end” in line 1 and “the corresponding wire electrode site” in lines 5-6 lack antecedent basis; “complimentary” should read --complementary--. Claim 2 – “the corresponding complimentary electrode” in lines 6-7 lacks antecedent basis; “complimentary” should read --complementary--.

Response to Arguments

Applicant's arguments filed March 6, 2002 have been fully considered but they are not persuasive. As presently recited, step (c) of claim 1 is not clearly understood. Identifying and associating an electrode infers an existing electrode; however, the disclosure merely details how an electrode is formed. As to claim 2, the disclosure is simply silent as to applying a voltage to an electrode to associate a proximal connection therewith. Accordingly, the above rejection under 35 U.S.C. 112, first paragraph, is still deemed to be proper.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nardella shows an electrode locating system.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3739

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
